1919 M Street, NW
Washington, DC 20554

Greetings,

As a listener of KAW 88.9 in Lawrence, Kansas I write in support of Petition RM-9242 which will make low-power community radio alive and well. Our station runs on 10 watts of power and a lot of community pride. Imagine, instead of commercials trying to sell you something you probably don't need, we have announcers who regularly interrupt programs with descriptions of social service agencies and where to call if you need help. Please help us make this wonderful experiment in grass-roots democracy legal. Thank you.

Sincerely,

John Funke
